

OWNER'S MANUAL KLEPCYS GMT RETROGRADE

Congratulations on the purchase of your exclusive CYRUS timepiece and thank you for the trust!

We are very proud to welcome you to the selected group of happy owners of this exceptional watch.

The KLEPCYS GMT RETROGRADE is produced in a limited series of 50 pieces for each version: in polished titanium, in polished titanium with black DLC bezel and in full black DLC titanium. This creation boasts an easy to use 24-hour second time zone function. The KLEPCYS GMT RETROGRADE is entirely produced in our Manufacture Chronode in Le Locle, Switzerland, and is equipped with the in-house self-winding CYR708 calibre which ensures a power reserve of 55 hours.

By selecting CYRUS KLEPCYS GMT RETROGRADE, you have chosen innovation, exclusivity and a strong identity.

We invite you to consult the instructions for use and wish you an excellent journey in the universe of CYRUS timepieces.

CYRUS, The Conquest of Innovation!

CONTROLS AND INDICATIONS

- A. Hours hand (local time)
- B. Minutes hand (local time)
- C. Seconds hand
- D. Jumping retrograde hours hand (home time)
- E. 24-hour dual time display

OPERATING INSTRUCTIONS

Crown at 3 o'clock

WINDING THE WATCH

Position I'

Turn the crown clockwise to wind the watch. When the movement is fully wound (about 45 turns of the crown), a power reserve of 55 hours is granted. The automatic movement allows the watch to wind up by simply using the energy produced by the wearer's own movement. If the watch stops, you need to wind it manually by turning the crown.

SETTING THE TIME

Position I''

Pull out the crown in position I'' for the time setting of the three hands: local time (A), minutes (B) and home time (D). The three hands rotate simultaneously. The hands turn clockwise and counterclockwise. Lock of the 3 hands (A-B-D) in counterclockwise correction when the home time retrograde hand (D) reaches 12.00 o'clock AM (hand with triangular tip on the numeral 24 on the left of the 24h display (E)).

Seconds hand (C) requires no adjustment.

Crown at 9 o'clock

QUICK SETTING OF THE MAIN TIME (Local Time)

Pressing the pusher on the crown, the local time hand (A) moves forward by one hour jump to set the desired time (quick setting when arriving to a new destination).

During the local time adjustment, the home time (D) and minutes hands (B) of the local time remain unchanged.

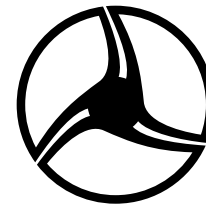

Finally, we recommend you have your watch checked and serviced through an official representative of the CYRUS brand every 3 years and you will enjoy your watch for lifetime.
